PROFILE

Full Stack Software Engineer and M.Sc. Computer Science student at the University of Siegen with 4+ years of professional experience in architecting scalable, enterprise-grade applications. Expert in Next.js, TypeScript, and the MERN stack, I combine solid Clean Architecture principles with modern AI-driven innovations like LLM integration and RAG pipelines. From managing Cloud-Native AWS infrastructures to delivering type-safe, high-performance SaaS platforms, I am committed to writing maintainable and secure code tailored for the rigorous standards of the German tech ecosystem.

PROFESSIONAL EXPERIENCE

03/2023 – 10/2025
Houston, Texas

Full Stack Software Engineer | MERN, Next.js & AWS (Remote), HAR.com

- AI/LLM Pipelines: Deployed Next.js apps with Gemini/OpenAI via LangChain & RAG; optimized prompting and document analysis to boost efficiency by 50%.
- Frontend Architecture: Architected type-safe React/Next.js interfaces using TypeScript, driving a 15% engagement boost via Core Web Vitals.
- Backend & APIs: Engineered resilient Node.js/Express RESTful APIs with secure OAuth2 and business logic for high-volume data processing.
- Database Systems: Orchestrated PostgreSQL (Vector-Search) and MongoDB; utilized indexing/aggregation to slash data latency by 200ms.
- Modular UI/UX: Built premium component libraries via Tailwind CSS & ShadCN, accelerating development cycles by 30% with minimalist design.
- Quality Assurance: Established Cypress (E2E) and Jest workflows, ensuring 95%+ code coverage and a secure, zero-fault production environment.

03/2021 – 02/2023
Karachi, Pakistan

Associate Software Engineer | Web Development & System Security, Pakistan Navy

- Workflow Digitization: Engineered tracking tools for mission-critical operations, reducing administrative processing time by 40%.
- Legacy Modernization: Modernized high-security interfaces using ES6+, increasing data accuracy and responsiveness by 30%.
- Infrastructure Stability: Managed 100+ terminals via automated scripts, achieving 99.9% uptime in a zero-fault environment.
- Secure Architecture: Implemented RBAC-based architectures, ensuring zero security breaches and strict data protocol adherence.

EDUCATION

10/2025 – Present
Siegen, Germany

Master of Science (M.Sc.) in Computer Science, University of Siegen

03/2021 – 03/2025
Karachi, Pakistan

Bachelor of Science (B.Sc.) in Computer Science, Virtual University of Pakistan

Skills

AI & Emerging Technology

- **Frameworks & LLMs:** LangChain, RAG (Retrieval-Augmented Generation), Gemini API, OpenAI API
- **AI-Assisted Dev:** Cursor, Claude Code, GitHub Copilot,
- **Vector Intelligence:** Vector Embeddings, Semantic Search, Prompt Engineering.

Backend & Infrastructure

- **Architecture:** Cloud-Native Architecture, Microservices, SaaS Ecosystems.
- **Server-side:** Node.js, Express.js, Prisma (ORM), Inngest, Auth (Clerk, JWT).
- **Databases:** PostgreSQL (Vector-Search), MongoDB, MySQL, Neon DB, Redis.
- **DevOps & Cloud:** AWS (EC2, S3, Lambda), Docker, GitHub Actions (CI/CD), Linux Environment, REST APIs, Imagekit

Frontend Engineering

- **Core:** TypeScript, JavaScript (ES6+), React, Next.js, HTML5, CSS3.
- **State & Data:** Redux Toolkit, React Query, Zustand, Zod, React Hook Form.
- **UI & UX:** Tailwind CSS, Figma (Design-to-Code), ShadCN UI, Material UI (MUI), Framer Motion.

Quality & Methodology

- **Testing:** Unit, Integration & E2E Testing, Jest, Cypress (E2E), React Testing Library, Test-Driven Development (TDD).
- **Workflow:** Technical Consulting, Agile (Scrum/Kanban), Git/GitHub/GitLab, Jira, Postman.

PROJECTS

AI Note Taker SaaS, *Next.js, LangChain, Gemini API, Convex, Clerk, Paddle*

- Built AI SaaS for PDF summarization & vector search using LLM pipelines.
- Implemented auth + subscription billing (Paddle) with real-time backend (Convex).
- Designed scalable full-stack architecture with optimized API workflows.

[Live Demo] [↗](#) | [GitHub] [↗](#)

AI Multi-Vendor E-Commerce SaaS, *Next.js, Tailwind, Clerk, Neon DB, Inngest, ImageKit, Paddle, Gemini API*

- Developed Multi-vendor E-commerce SaaS with Role-based dashboards (Admin/Seller/Customer), memberships, coupons and payments.
- Integrated AI suggestions in Seller Dashboards to automate and optimize product listings using LLMs.
- Engineered event-driven backend using Inngest and ImageKit for async workflows and optimized media.

[Live Demo] [↗](#) | [GitHub] [↗](#)

Analytics & Data Visualization Dashboard,

TypeScript, Next.js, React, Tailwind, ShadCN UI, Zod, React Hook Form, Recharts

- Built an analytics dashboard with interactive charts and KPI tracking using Recharts.
- Implemented schema validation with Zod and built reusable UI components for scalable workflows.

[Live Demo] [↗](#) | [GitHub] [↗](#)

Community Discussion Platform, *PHP, MySQL, Bootstrap, AJAX*

- Developed forum with posts, answers, and nested discussions
- Implemented authentication and dynamic updates using AJAX
