PROFILE

Full Stack Software Engineer with 4+ years of experience specializing in TypeScript, Next.js, and the MERN stack. Skilled in building scalable web applications, SaaS platforms, and AI-powered applications using modern LLM tools and APIs. Experienced in developing high-performance backends with Node.js, Express, and PostgreSQL, with strong focus on clean architecture, type safety, and system optimization. Proven ability to deliver production-grade solutions in enterprise environments.

PROFESSIONAL EXPERIENCE

Full Stack Developer | MERN, *Qubitse Enterprises (Pvt.) Ltd.* 03/2023 – 10/2025
Karachi, Pakistan

- Spearheaded MERN stack development for har.com , leveraging Next.js and TypeScript to engineer features for a platform serving millions of users, resulting in a 15% increase in user engagement.
- Architected interactive analytics dashboards using Recharts, visualizing property market trends that improved data processing speed for end-users by 25%.
- Integrated Mapbox API for advanced geospatial search, reducing map rendering time by 30% and enabling real-time visualization of Houston's massive real estate datasets.
- Optimized platform load speeds by 20% through advanced server-side rendering (SSR) and memoization, leading to a significant boost in SEO rankings and lower bounce rates.
- Architected type-safe API layers using RTK Query and Zod, which reduced production runtime errors by 40% and streamlined the development workflow.
- Engineered scalable backend microservices with Node.js and PostgreSQL, optimizing complex relational queries that reduced server response times by 200ms under peak load.

Junior Frontend Developer, *Pakistan Navy* 03/2021 – 02/2023
Karachi, Pakistan

- Digitized manual reporting workflows by engineering internal web-based tracking tools, reducing administrative processing time by 40% across technical units.
- Modernized legacy interfaces using Modern JavaScript (ES6+), which increased data entry accuracy and speed by 30% for mission-critical operations.
- Maintained 100+ mission-critical terminals with automated monitoring scripts, achieving a 99.9% operational uptime in a high-security environment.
- Developed secure frontend architectures implementing Role-Based Access Control (RBAC), ensuring zero security breaches and strictly adhering to departmental data protocols.

EDUCATION

Master of Science (M.Sc.) in Computer Science, *University of Siegen* — 10/2025 – Present, Siegen, Germany

Bachelor of Science (B.Sc.) in Computer Science, *Virtual University of Pakistan* — 03/2021 – 03/2025, Karachi, Pakistan

SKILLS

Frontend Engineering
- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3.
- **State & Data:** Redux Toolkit, React Query, Zustand, Zod, React Hook Form.
- **UI & UX:** Tailwind CSS, Material UI (MUI), ShadCN UI, Framer Motion, Mapbox.

Backend & Infrastructure
- **Server-side:** Node.js, Express.js, JWT, Clerk Auth, Inngest.
- **Databases & ORM:** PostgreSQL, MySQL, MongoDB, Prisma, Neon DB, Convex, Firebase.
- **DevOps & Cloud:** Docker, AWS, REST APIs, SaaS Architecture, ImageKit.

Specialized & Soft Skills
- **Emerging Tech:** LLM Integration (AI-Powered Solutions), Vector Embeddings.
- **Methodology:** Agile (Scrum/Kanban), Git/GitHub, Jira, Vercel, Postman.

LANGUAGES

German — (B1 – Intermediate) • **English** — (C1 – Professional) • **Urdu** — (Native)

PROJECTS

AI Note Taker SaaS, *Next.js, TypeScript, LangChain, Gemini API, Convex, Clerk, Paddle*
- Built AI SaaS for PDF summarization & vector search using LLM pipelines
- Implemented auth + subscription billing (Paddle) with real-time backend (Convex)
- Designed scalable full-stack architecture with optimized API workflows

[Live Demo] | [GitHub]

AI Multi-Vendor E-Commerce, *Next.js, Tailwind, Clerk, Neon DB, Inngest, ImageKit, Paddle, Gemini API*
- Developed multi-vendor platform with role-based dashboards & AI recommendations
- Integrated async workflows (Inngest) and optimized media handling (ImageKit)
- Built scalable backend with event-driven architecture & secure payments

[Live Demo] | [GitHub]

Modern Admin Dashboard, *Next.js, React, Tailwind, ShadCN UI, Zod, React Hook Form, Recharts*
- Built analytics dashboard with interactive charts & KPI tracking
- Implemented validation (Zod) and reusable UI for scalable workflows

[Live Demo] | [GitHub]

Full-Stack Discussion Board, *PHP, MySQL, Bootstrap, AJAX*
- Developed forum with posts, answers, and nested discussions
- Implemented authentication and dynamic updates using AJAX

[Live Demo] | [GitHub]
